

Massage Therapy works!

By Tara Collis

Dated: Jul 11, 2008

The Medical community is embracing what consumers already know; Massage Therapy works!

Michelle Lea Massage Therapy is beginning development along the Mid-Atlantic and South East. Our headquarters/clinic is based out of Southern Maryland focusing on healthcare through alternative therapies such as: Massage, Acupuncture and Holistic natural approaches to well being.

Make a difference in your community helping folks of all ages to improve their quality of life. You don't need to be a therapist to own your own clinic; just a desire to succeed and handle typical business management tasks.

How/Why it works

- We train and support you through all aspects of ownership.
- We put you on the track for recognition by insurance companies and medical professionals.
- Folks of all ages deal with pain; therefore there will always be a need for pain management.
- People second guess frivolous spending but not when it comes to the healthcare of themselves or their loved ones.
- Quality of life is important to folks of all ages.

When you buy into a proven system, you are also getting ongoing support, training, field representation and corporate management assistance on a regular basis. This support is there when you open your doors and for the entire term of the agreement. Something you wouldn't have if you were doing it by yourself (hence the high failure rate for non-franchised new businesses).

"I take this company seriously and personally. I am sincere about helping people and want to see them succeed. As a licensed therapist and owner of this company I know the "cellular" nature of the industry I've devoted almost 20 years to".

If you would like to learn more about Franchise Opportunities with Michelle Lea Massage Therapy please check out their website at www.LeaMassageTherapy.com or call 301.475.2200 x102 for more information.

###

Holistic natural approaches to healthcare through Massage Therapy, Acupuncture, Nutritional Counseling and various forms of alternative therapies. We treat the "whole" body and not the symptoms.
